

Instant traffic & weather provided through XM Radio is an invaluable service. Most people subscribe to XM because they travel frequently and want consistent service over many areas. Since myself and other subscribers are often travelling out of town or out of state, the instant traffic and weather reports provided through XM offer a service that is unparalleled by conventional broadcasting in local radio markets.

It's time we consider whose interest matters most here; the consumers, or the broadcasting corporations that provide only mediocre service to its audience. The consumers have spoken. The popularity of satellite radio speaks for itself. XM Radio should continue to provide the best possible service to its subscribers, including its invaluable instant traffic and weather reports.

Sincerely,

Gwendolyn Corso  
XM Listener
